

## BIRD LIST

Over 100 species of birds have been recorded on the farm/reserve, some which are permanent residents, while other species visit seasonally.

Birds are mostly found around the drainage lines or water, but keep your eyes peeled for the cryptic or “drab” birds, like some of the lark species, that can be found occasionally hopping amongst the Karoo scrub.

Please let us know what birds you observed, and if you see a bird not on our list, we would love to add that record to our list ([info@ouberg.co.za](mailto:info@ouberg.co.za)).

If you enjoy taking photographs of birds and other organisms, please consider contributing your records to the appropriate Virtual Museum, curated by the Biodiversity & Development Institute (BDI) <http://thebdi.org/> and the FitzPatrick Institute of African Ornithology, University of Cape Town <http://vmus.adu.org.za/>.

*Cape Bunting*
